

VERSION 1.0 | 2025

BRAND GUIDELINES

SWERVE

SWERVE is an investing platform designed for a new generation of users — *intuitive, clear, and relevant.*

We simplify the schema of things and design experiences that *feel sharp, fluid, and responsive.*

SWERVE is an investing platform designed for a new generation of users — intuitive, clear, and deeply relevant to how modern minds engage with money.

We believe that finance doesn't need to be intimidating. With the right tools and the right tone, it can feel fluid, empowering, and even enjoyable. SWERVE simplifies complex ideas, reduces visual noise, and delivers an experience that feels as smooth as it is smart.

Our brand identity is crafted to reflect:

- Visual clarity — interfaces that feel light, breathable, and easy to navigate
- Movement and progression — design choices that mirror growth and decision-making
- Modern simplicity with technical relevance — every element grounded in logic, not just aesthetics

Every touchpoint — from logo to layout — supports a product that's both data-literate and human-aware. This is finance, redesigned for how people think and feel today.

THE LOGOS

BOLD. THOUGHTFUL. DISTINCT.

The "W" — our Signature Element

The heart of our identity lies in the custom "W", inspired by real-world trading patterns like the Head and Shoulders chart — commonly seen in technical analysis.

This pattern represents movement, insight, and the logic behind our investing philosophy.

It also naturally forms the upward and downward shapes that visually resemble a stock chart.

This is not just a letter — it's a signal.

Used in brand patterns, app icon, favicon, and animations

For hero moments and highlights.

Use on light, minimal backgrounds.

Best on dark or image overlays.

1. Primary Logo (Gradient W)

This is our flagship logo.

It features the full SWERVE wordmark with the custom “W” rendered in our signature blue-to-purple gradient — symbolizing momentum, clarity, and progression.

- The gradient adds fluidity to the otherwise bold type
- Best suited for hero placements, digital screens, splash pages, and marketing material
- Reflects both our product’s purpose and brand energy: *calm, calculated movement*

SWERVE

2. Solid Black Logo

Used in high-contrast environments where clarity and minimalism are key.

- Clean and impactful on white or light backgrounds
- Ideal for print, grayscale docs, or low-noise UI contexts
- Keeps the integrity of the W's form while maintaining high legibility

The word "SMERVE" in a bold, sans-serif font, rendered in solid black.

3. Solid White Logo

Optimized for dark mode, overlay use, and color-heavy compositions.

- Best for use on darker gradients or imagery
- Maintains recognizability and contrast without overpowering the layout
- Commonly used across onboarding screens, banners, and cards

The word "SMERVE" in a bold, sans-serif font, rendered in solid white.

THE COLORS

CALM. CONFIDENT. CALCULATED.

THE COLORS

The SWERVE color palette is designed to bring clarity to complexity.

Each shade is selected not just for aesthetic appeal, but for its ability to support **confident decision-making, clean layouts,** and a product experience that feels **approachable and modern.**

The palette balances **bold core tones with soft UI-friendly neutrals** — helping users stay focused, not distracted.

PRIMARY COLORS

Core Purple
#9666e3

Primary Blue
#1892f3

SECONDARY COLORS

Soft Purple
#d1c4fc

Soft Blue
#cfe6fa

NEUTRAL COLORS

Neutral Black
#2c2c2e

Base White
#f3f1f3

THE COLORS

Core Purple
#9666e3

Bold, confident, and expressive — the foundational color of the brand. Represents big ideas, bold moves, and standing out without shouting.

Soft Purple
#d1c4fc

A lighter counterpart to Core Purple — calm, clean, and supportive. Brings balance to interfaces without adding noise.

Primary Blue
#1892f3

Crisp, clear, and energetic. The color of motion and decision-making. Used to guide users through actions with confidence and clarity.

Soft Blue
#cfe6fa

Fresh and airy. A base for space, background, or breathing room. Helps layouts feel light, even when dense with data.

Neutral Black
#2c2c2e

A soft, modern black — solid and structured. Ideal for dark mode, typography, and grounding all other colors.

Base White
#f3f1f3

A gentle off-white — easy on the eyes. Keeps the brand clean and UI elements spaced and readable.

THE GRADIENT

FLOW, NOT FLAT.

WHY GRADIENT

SWERVE isn't static — it's a brand built on motion, insight, and transition.

Gradients represent that sense of movement — from uncertainty to clarity, from question to decision.

They soften sharp edges, guide the eye, and bring emotion into digital environments that can otherwise feel rigid or sterile. Used intentionally, gradients become one of our most powerful tools to create depth, fluidity, and modernity in our visual identity.

How to Create SWERVE Gradients

SWERVE gradients are always built from our existing color palette — no external or third-party colors.

Start with:

- Core Purple (#9666E3)
- Primary Blue (#1892F3)

Then blend with any of the supporting tones:

- Soft Purple (#D1C4FC) or Soft Blue (#CFE6FA)
- Optional highlight or balance with Base White (#F3F1F3) and Neutral Black (#2C2C2E)

Use linear gradients moving left to right or top to bottom
Stick to three to four shades max to maintain clarity

How to Use Gradients

Gradients are not for decoration — they are used with purpose and restraint.

Use gradients:

- As background fills for hero sections, splash screens, dashboards
- In loading states, transitions, onboarding flows
- Behind the logo (especially the Gradient W)

Avoid gradients:

- In body text
- Behind large blocks of data
- In small UI components (buttons, toggles, inputs)

Keep gradients subtle, breathable, and free from harsh saturation shifts.

Dark Mode Gradient

For dark mode, SWERVE uses a deeper gradient that maintains depth without overpowering.

Colors Used:

- Pulse Blue (#6BD6FF)
- Synth Purple (#AA7BFF)
- Ghost Lilac (#E3CFFF)
- Infra Shadow (#0E0D11)

This gradient works best:

- As full-screen backgrounds
- In app screens where black/gray alone would feel flat
- Behind white text or light UI components

The dark gradient should feel calm, confident, and premium — never loud or neon.

THE TYPE

CLEAN. CONFIDENT. BUILT FOR UI.

Primary Typeface: Poppins

Poppins is our core brand typeface. It's a geometric sans-serif font with a clean, modern tone that aligns perfectly with SWERVE's design language. It's structured, yet soft. Neutral, but not bland. **And above all — built for digital.**

Why Poppins?

- Legibility at all sizes — from tooltips to headers
- Balanced letterforms that feel approachable, not corporate
- Consistent vertical rhythm for smooth layouts and clean spacing
- Available in multiple weights — perfect for hierarchy and micro-interactions

Poppins keeps the interface feeling light and easy to scan — no matter how data-heavy the page gets.

Font Weights & Usage

Bold	Page titles, H1 headers, key moments
Medium	Subheaders, labels, menu items
Regular	Body text, captions, tooltips
Light (optional)	Supporting text, form hints (used sparingly)

BRAND PATTERN

STRUCTURE. MOVEMENT. RECOGNITION.

Visual Strategy

The pattern gives us a non-verbal brand tool. It's highly scalable and allows us to show up across channels even when the logo isn't present.

It signals:

- A brand that understands structure
- A system built on logic
- A visual identity that moves with purpose
